

BOARD OF JACKSON COUNTY ROAD
COMMISSIONERS

POLICY STATEMENT

Policy Number: 10-01

Date: 04/14/2010

Subject: Private Order Dust Control

=====

If the township chooses not to participate in the Dust Control Program with the Jackson County Road Commission, the following is presented as a method for residents of Jackson County to request the Jackson County Road Commission to apply **private order dust control** on unpaved public roads for a nominal fee. If residents on the same road desire to pay for private dust control, the residents shall join together and contract for a joint application.

The residents requesting for private order dust control will appoint one person for the given roadway as the contact person and the subsequent invoice will be sent to that contact person for payment. *Payment for dust control service shall be paid for in advance with the brine cost being the same as the townships.*

As part of its dust control program, the Jackson County Road Commission first thoroughly grades the road if feasible, and then sprays on approximately **2,500 gallons** of brine **per** mile. Since subsequent road, grading will mix the dust control material below the surface of the road, during summer months the Road Commission attempts to restrict grading on unpaved roads unless they are followed by new dust control applications.

Please keep in mind the following:

Weather and scheduling problems may *alter* the application date.

The Road Commission cannot guarantee that any private order for dust control will not conflict with grading, dust control or other work in connection with township agreements.

The Road Commission prefers that private orders for dust control be mailed or the form may be dropped off with the check at our office at 2400 Elm Rd, Jackson.
